

## Инструкция по настройке ADSL модема Zyxel P660HTW2

- 1. Откройте на компьютере веб браузер, например Internet Explorer.
- 2. В строке адреса наберите 192.168.1.1

- 3. Появится предложение ввести пароль для входа в меню модема. Введите пароль.
- Обязательно нужно очистить поле Password (стереть то, что введено в этом поле) и вручную вписать пароль. По умолчанию в модеме установлен пароль 1234.

|--|-------------|------------|----------------|-------|
|  | Use this sc | reen to ch | ange the passv | vord. |
| Your router is currently using the default password. To protect your network<br>from unauthorized users we suggest you change your password at this time.<br>Please select a new password that will be easy to remember yet difficult for<br>others to guess. We suggest you combine text with numbers to make it more<br>difficult for an intruder to guess.<br>Enter your new password in the two fields below and click "Apply". Otherwise<br>click "Ignore" to keep the default password |             |            |                |       |
| New Pas  | sword:      |            |                |       |
| Retype t   | o Confirm:  |            |                |       |
|  |             | Apply      | Ignore         |       |

5. При первом подключении к DSL-модему появляется окно, в котором предлагается выбрать режим вебконфигуратора. Установите переключатель в пункте Go to Advanced setup и нажмите кнопку Apply.

| ZyX                            | EL  |
|--------------------------------|---|
|                                | Please select Wizard or Advanced mode   |
| The Wiz<br>We sugg<br>router o | ard setup walks you through the most common configuration settings.<br>lest you use this mode if it is the first time you are setting up your<br>r if you need to make basic configuration changes. |
| Use Adv<br>included            | anced mode if you need access to more advanced features not<br>in Wizard mode.  |
| O Go                           | to Wizard setup   |
| • Go                           | to Advanced setup   |
| Clic                           | chere to always start with the Advanced setup.  |
|                                | Apply Exit  |

6. После этого вы увидете основную страницу веб-конфигуратора модема.
